ZAGTRADER AT A GLANCE

One platform runs the whole trading business, from the order to the ledger

100+
institutions trust and use the platform

$500B+
in client assets on the platform

10M+
transactions every day

25+
markets and exchanges connected

2009
in production since

Front to back

Order management, risk, margin, custody, settlement, accounting and reporting in one system.

Built in the region

Live on GCC exchanges, with Islamic finance and English and Arabic for clients.

Your way

Managed cloud, on-premise or hybrid, fully white-labelled.

PROOF

Market infrastructure runs on ZagTrader technology

Tabadul Hub

The cross-border exchange hub: 11 exchanges and 100+ member firms trading through ZagTrader technology.

Dubai Financial Market

iVestor brokerage and back office running on the platform.

Abu Dhabi Securities Exchange

Market simulation and a managed order-management service for exchange members.

Boursa Kuwait

Market-making surveillance and reporting.

Alongside banks, brokers, market makers and a regulated venue across the GCC, the wider Middle East, Africa, Europe and Asia.

ZagTrader

THE PLATFORM

One platform, five product families

Start with what you need and add the rest later: every product shares one login, one AI assistant and one set of APIs.

1 Trading & Connectivity

Multi-asset order management and execution, algorithms, FIX connectivity and routing to markets worldwide.

2 Margin & Securities Finance

Margin financing, securities lending, repo, prime services and Islamic finance.

3 Post-Trade & Custody

Settlement, custody, SWIFT messaging, corporate actions and the general ledger.

4 Wealth & Investment Office

Portfolio management, the Investment Office book of record, onboarding and client reporting.

5 Exchange & Market Operations

Matching, market controls, market-making surveillance and digital assets for venues.

+ Across the platform

Real-time risk and compliance, AI, open APIs, managed hosting and the ZagFN network.

WHO WE SERVE

Built for every institution in a capital market

Sell side

Brokers and banks

- Retail and institutional brokers
- Investment and commercial banks
- Market makers and clearing members
- Fintechs launching trading apps

Buy side & wealth

Managers of wealth

- Asset managers
- Private banks and wealth managers
- Single and multi-family offices
- Investment offices and holding companies

Market infrastructure

Venues and post-trade

- Exchanges and market operators
- Exchange hubs and their members
- Custodians
- Digital-asset venues

ZAGFN NETWORK

Connected to the world's markets, hosted close to yours

1,100+

brokers, banks and venues reachable through ZagFN

25+

markets and exchanges, direct and through partners

Direct exchange connections plus routes through Bloomberg EMSX, NYFIX and other networks, across equities, fixed income, FX, derivatives and digital assets.

Managed cloud

Run on ZagFN, hosted in-region and operated by our team.

On-premise or hybrid

In your own data centre, or split between the two.

Open APIs

REST, FIX and WebSocket for every product.

BUILT FOR THE REGION

Live on GCC markets, ready for the next one

Saudi Arabia

Tadawul trading with Edaa and Muqassa post-trade, and the controls Saudi brokers run under.

UAE and the GCC

DFM, ADX, Nasdaq Dubai, Boursa Kuwait, Muscat, Bahrain and Qatar, plus the Tabadul cross-border hub.

Islamic finance

Shariah-compliant margin through Tawarruq, sukuk trading and servicing, and Shariah classification of securities.

English and Arabic

Client apps and statements in both languages, with an AI assistant that answers in either.

Beyond the GCC

Amman, Iraq, Baku, Bucharest, Mauritius, London, Cyprus, Dhaka, Colombo and more.

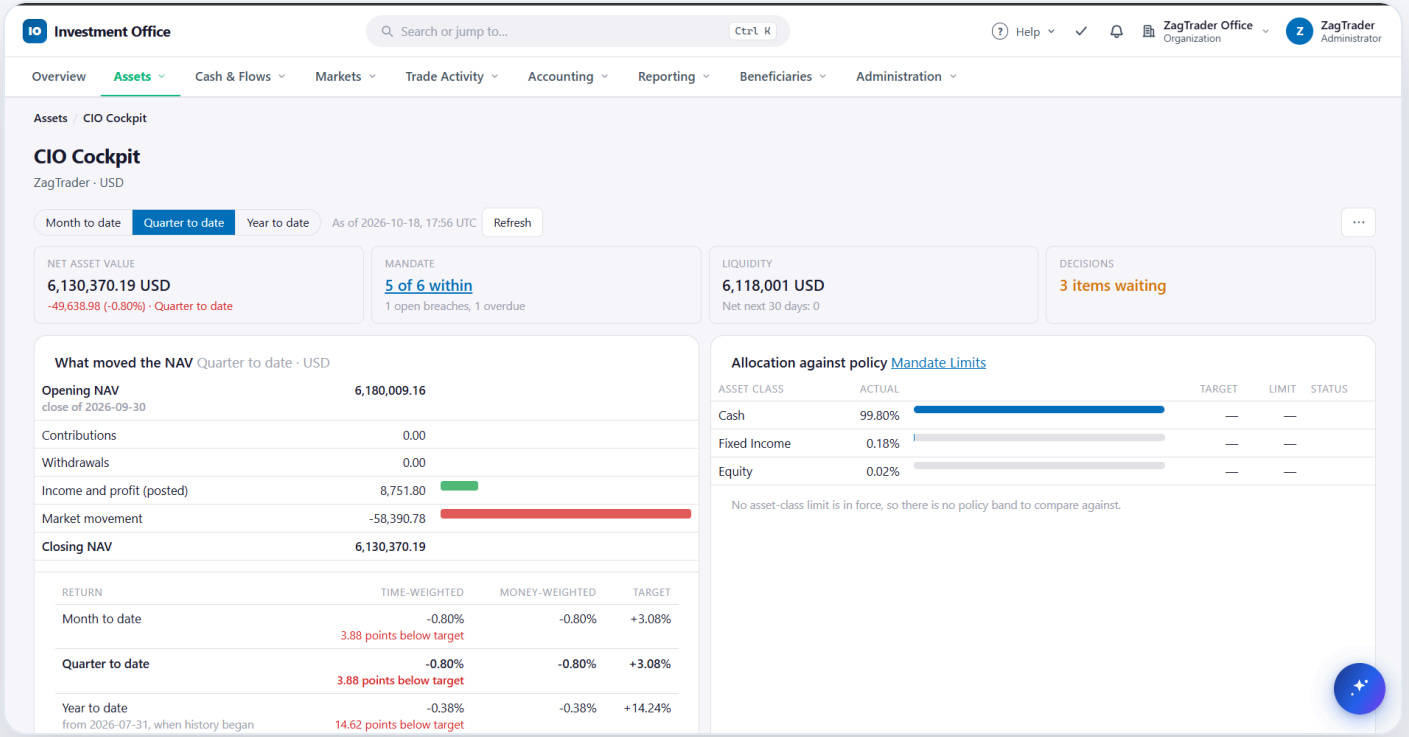
Local teams

Offices in Dubai, Riyadh, Amman, Cairo, London, Colombo, Islamabad and Manila.

NEW PRODUCT

Investment Office: the book of record for family and investment offices

- **One family book** across every beneficiary and custodian
- **Four eyes** on trades, payments, transfers and corporate actions
- **Mandate limits** with a warning before a breach
- **Daily valuation** and time- and money-weighted returns
- **CIO Cockpit** and a printable committee pack
- **Statements** in English or Arabic, scheduled and e-mailed



AI AT ZAGTRADER

AI that works inside the platform, and builds on it

The assistant

Answers questions from your live data, within each user's permissions

Explains reports, errors and settings, even from a screenshot

Drafts new reports and prepares orders that a person approves

For staff and their clients, in English and Arabic

Build on ZAG

A developer kit an AI coding assistant reads to learn the platform

API reference, SDK with live prices, sample apps and an agent tool server

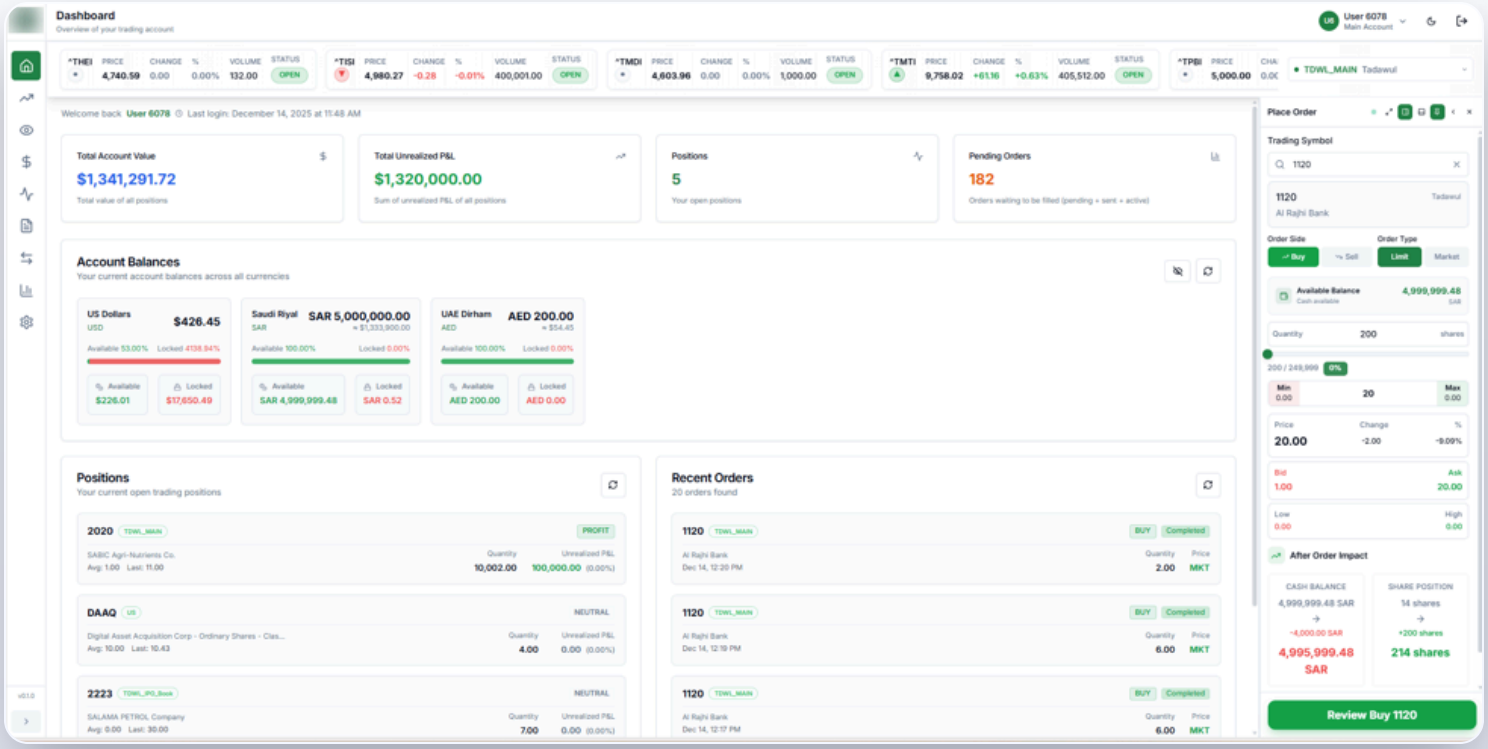
Describe a trading screen or report, and the assistant builds it

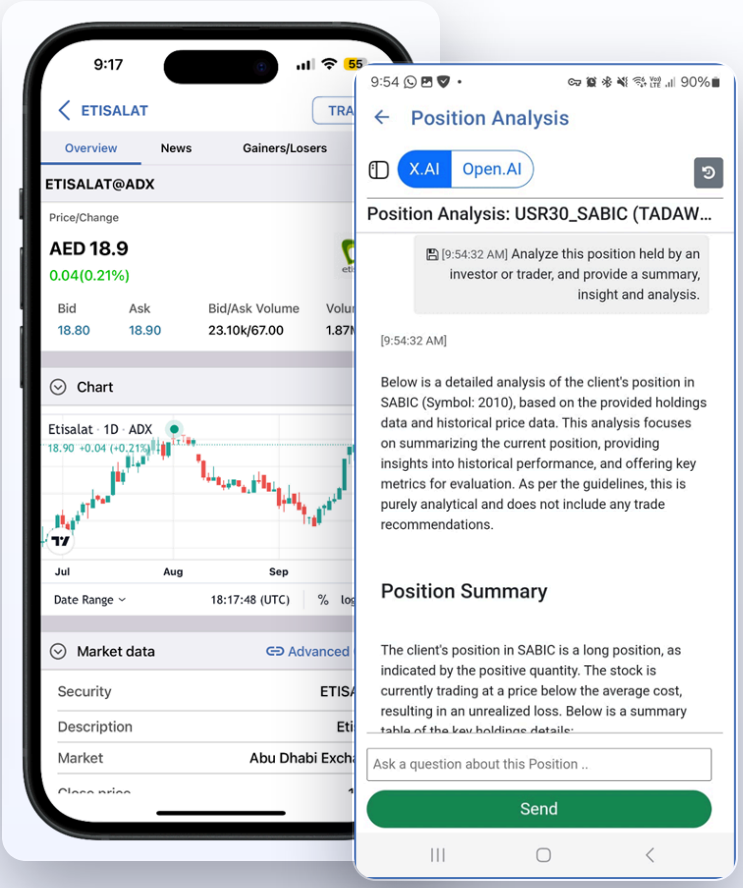
No coding needed from you

A person approves every action the AI prepares, under a board-adopted AI rulebook.

THE PRODUCT

Professional tools for staff, simple apps for clients





LEADERSHIP AND BOARD
